Have a Beautiful Lawn

YOPP OFFER THE BEST IN LAWN MIXTURES FOR THE PURCHASE AREA. Not only are the best of domestic and imported seeds used in YOPP LAWN MIXTURES, every seed is slurry treated with special DUPONT ARASAN which gives Yopp lawn seed protection against decay and destructive soil fungi. This special "Arasan" treatment helps protect young grass seedlings from damping off, blight, root rots and other causes of high mortality suffered by untreated seed. The result is a QUICKER, THICKER STAND.

YOPP'S NEW ALL-PURPOSE LAWN MIXTURE contains:

Ky. Blue Grass for permanence.

Bent Grass for soft texture.

Chewing Fescue to resist heat.

Especially adapted for use under trees.

This will put the seed into the soil. Water freely.

BIRD VITA BANDS

VITA BAND "D", the unique nutrient-treated, disintegrating plant band, controls root growth for short growing periods. Grower controls penetration of root growth through band, by cracking it at time of transplant. Band then disintegrates in the soil.

VITA-BAND "10", nutrient, treated, aids plant growth from seedling through time of transplant. At that time, this band is removed, and with normal handling, compact healthy rootball is set without transplant shock.

Erosionet

is a strong, open mesh fabric made of tightly twisted paper twine. When placed on seeded areas of slopes and terraces that are

apt to wash, its 1/4 inch square mesh forms millions of tiny dams which catch and hold the seed firmly in place. Erosionet also catches and holds moisture. It helps overcome seed losses and lawn disappointments from poor germination.

Erosionet comes in rolls 45 inches wide. Price per lineal yard: 1 to 25 yards, 21c; 25 to 99 yards, 20c; 100 yards or over, 19c. Postpaid—Add 2c per yard.
